

Crates Flow In Our Chain

RIMI Baltic Supply Chain

➤ Crates have different sizes

Current situation. Challenges

- Packages have different dimensions
- Picking becomes puzzle – using shelves decreases efficiency

Current situation. Challenges

➤ Working with crates
variety is time, space &
inventory consuming

Current situation. Challenges

Rimi

➤ Carton usage causes shrink & waste throughout supply chain

Current situation. Challenges

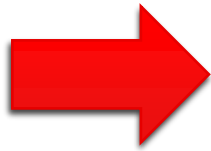

- Standardised crates would better fit product sizes
- Less air transported

Future. Benefits of standardisation

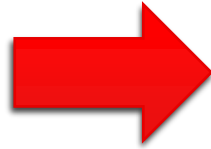

➤ Much easier to stack
all crates

Future. Benefits of standartisation

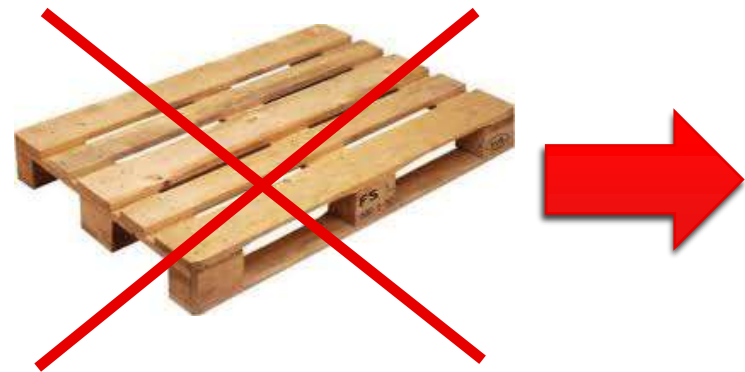

➤ Higher stacks would improve truck occupancy

➤ Increased operations efficiency

Future. Benefits of standardisation

- Dollies, used with standardised crates, could replace pallets in transportation
- No pallets, no abrasion – lower costs.

Future. Benefits of standardisation

➤ Standardised crates,
used instead of
carton or plastic,
would lower waste

➤ Reduced waste, would
lower costs.

Future. Benefits of standardisation

Rimi

Thank You!
